

Special Issue

Global Commons Governance and Sustainable Land Use

Message from the Guest Editors

The primary objective of this Special Issue is to enhance systematic research on global commons governance and sustainable development by exploring novel studies on global commons governance and sustainable land use. High-quality research on the following topics is welcome: policy changes in global commons governance, valuation of global natural resources, vegetation cover changes in global commons, interest relations among governance subjects in global commons, environmental benefits of governance, multi-purpose land utilization, global spatial planning, regional land consolidation, and other issues related to governance of the global commons and sustainable land use. We also welcome articles from interdisciplinary areas that are critical to the governance of the global commons and sustainable land development, such as the relationship between governance of the global commons and climate change, carbon neutrality, and its integration with global sustainable development.

Guest Editors

Prof. Dr. Fangzhou Xia

Prof. Dr. Hualin Xie

Prof. Dr. Xiaoshun Li

Dr. Ling Li

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
