# Special Issue

# Sustainable Forest Landscape Management Towards Ecosystem Services and Biodiversity

# Message from the Guest Editors

This Special Issue aims to present and discuss the latest advances in the study of biodiversity in forests, both in natural and anthropized landscapes, via different productive activities, as well as following the main recommendations to improve their conservation and maintain the provision of the ecosystem services. It also aims to review current applications regarding the use of remote sensors and other platforms, their state of the art in natural ecosystems, and to analyze the utility and feasibility of these tools. Suggested themes include, but are not limited to:

- Land-related issues in ecology, environmental/geosciences, economic (sustainability) sciences, and biodiversity research.
- Land-related aspects of biodiversity and forest management.
- Land management, including the application of ecosystem services, multifunctionality, or other concepts.
- Land-related trade-off analyses in resource management (e.g., biodiversity).
- Landscape and territorial planning, conservation, and management.
- New management proposals, e.g., variable retention forestry.

## Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
