

Special Issue

Exploring Multisensory Landscapes: 2023 Visual Resource Stewardship Conference

Message from the Guest Editors

Land use change has had a fundamental impact on the livelihoods of people throughout the world. This Special Issue will focus on the research being conducted at the intersection of this land use change and the importance of maintaining landscapes that enrich humanity and our engagement with nature. In this Special Issue, we will explore the value of landscapes that heighten the senses. Visual Resource Stewardship is an area of research that closely aligns with understanding how changes in the environment may be perceived and experienced. Understanding the tools, processes, and theories involved helps us to better understand how land use change impacts humanity, which is a critical endeavor in landscape planning. This Special Issue will welcome manuscripts that link the following themes:

- Multisensory Landscape Assessment;
- Visual Quality and Context Sensitive Design;
- Scenic Resource Valuation;
- Representation Methods and Systems Used in Assessments of Visual Perceptions;
- The Visual Effects of Climate Change and Renewable Energy.

Guest Editors

Prof. Dr. Richard Smardon

Department of Environmental Studies, SUNY College of Environmental Science and Forestry, 1 Forestry Drive, Syracuse, NY 13210, USA

Dr. Brent Chamberlain

Landscape Architecture and Environmental Planning, College of Agriculture and Applied Sciences, Utah State University, Logan, UT 84322, USA

Deadline for manuscript submissions

closed (28 June 2024)

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
