The Dynamics of Urbanization: Challenges and Solutions in Land Development and Regional Planning

Message from the Guest Editors

The process of urbanization is accompanied by dramatic land-use transformations in urban and rural areas. While urbanization drives regional economic growth and social development, it simultaneously generates multifaceted land-use challenges, including environmental degradation, urban sprawl, rural hollowing, farmland shortages, and social inequalities. Addressing these challenges requires innovative approaches to land development and regional planning that balance growth with sustainability. Urbanization pathways are deeply embedded in the distinct economic, social, and cultural contexts of nations and regions, resulting in significant variations in urbanization stages, land-use impacts, and planning responses across different settings. This Special Issue focuses on the dynamic patterns and mechanisms of urbanization, urban-rural land-use transitions in the context of urbanization, and regional planning responses to associated challenges. We welcome interdisciplinary contributions to exchange and advance knowledge in this field.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
