

## Special Issue

# Advances in Wildlife Conservation and Habitat Management in the Anthropocene

### Message from the Guest Editors

The Anthropocene, characterized by significant human impacts on Earth's ecosystems, has introduced a complex array of environmental stressors that significantly challenge traditional approaches to wildlife conservation and habitat management in terrestrial environments. In light of these challenges, advances in ecological monitoring, modeling, and management strategies in wildlife conservation and habitat management are essential in developing effective and adaptive strategies to mitigate the impacts of these complex and interacting stressors and to guide conservation planning in the Anthropocene. This Special Issue will welcome manuscripts including, but not limited to, the following themes:

- Innovative Conservation Methods and Technologies;
- Habitat Suitability Modeling under Climate Change;
- Anthropogenic Stressors and their Impact;
- Biotic and Abiotic Stressors;
- Protected Areas and Habitat Management;
- Conservation of Keystone and Threatened Species;
- Long-Term Monitoring and Evaluation.

We look forward to receiving your research articles and reviews.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
