

Special Issue

Advances in Wildlife Conservation and Habitat Management in the Anthropocene

Message from the Guest Editors

The Anthropocene, characterized by significant human impacts on Earth's ecosystems, has introduced a complex array of environmental stressors that significantly challenge traditional approaches to wildlife conservation and habitat management in terrestrial environments. In light of these challenges, advances in ecological monitoring, modeling, and management strategies in wildlife conservation and habitat management are essential in developing effective and adaptive strategies to mitigate the impacts of these complex and interacting stressors and to guide conservation planning in the Anthropocene. This Special Issue will welcome manuscripts including, but not limited to, the following themes:

- Innovative Conservation Methods and Technologies;
- Habitat Suitability Modeling under Climate Change;
- Anthropogenic Stressors and their Impact;
- Biotic and Abiotic Stressors;
- Protected Areas and Habitat Management;
- Conservation of Keystone and Threatened Species;
- Long-Term Monitoring and Evaluation.

We look forward to receiving your research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
