

Special Issue

Sustainable Urban Greenspace Planning, Design and Management

Message from the Guest Editor

With the rapid development of urbanization, in order to meet people's living needs, the city continues to expand, and the number of buildings continues to increase. However, behind these tall buildings we also see patches of greenspace—parks, greenbelts, plant-covered streets, etc. These greenspaces not only beautify the urban environment but also have an important impact on people's physical and mental health. However, although the importance of greenspace to the urban landscape cannot be ignored, in fact, we can still see that many cities lack enough green space. To solve this problem, the government and urban planners should take measures such as the rational planning of urban layout and increasing the green coverage rate. This Special Issue focuses on greenspace as an important point of reference for urban landscape planning, related to urban and rural contexts, with particular reference to the definition and implementation of planning and management aimed at protecting nature and natural resources. We welcome the submission of papers focused on the implications of planning, designing, or managing greenspaces.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
