

## Special Issue

# Land Modifications and Impacts on Coastal Areas, Second Edition

### Message from the Guest Editors

This Special Issue is aimed at collecting case studies from different zones across the world. With the aim of covering a comprehensive assessment of the interaction of natural and anthropic drivers inducing such modifications, we encourage authors to submit contributions in the following priority areas:

- Coastal evolution at different spatial and temporal scales;
- Effects of human activities on coastline dynamics;
- Impacts of extreme events and climate-related processes;
- Traditional and “green engineering” modalities in coastal protection;
- Mapping of land uses and land cover variations in coastal areas;
- Advances in coastal landscape geomorphological evolution;
- Agricultural activities in coastal areas;
- Effects of saltwater intrusion;
- Coastal area over-settlement;
- Beach litter characteristics, distributions, and behaviors in coastal landscapes;
- Beach oiling accident numerical models, distribution, and hazard maps for coastal land management;
- Chronic contamination of coastal water impacts on land–ocean interactions.

We look forward to your contribution.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
