

## Special Issue

# Landscape-Based Hydrological Models

### Message from the Guest Editor

Landscapes and hydrology are closely linked. Landscapes are considered to consist of topography and the ecosystems that live on them. Land cover and topography are two essential factors to distinguish different landscapes. Accurate monitoring of various hydrological cycle components and development of hydrological models are important to improve our understanding of hydrological processes. Therefore, the focus of this Special Issue advances in interaction between landscape traits and hydrological processes. All papers will be published in open access following peer review.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
