

## Special Issue

# Application of Participatory Geographic Information Systems in Land Use Planning

### Message from the Guest Editors

Participatory GIS (PGIS) is a valuable tool bridging space and citizens. It allows stakeholders and local communities to share their spatial knowledge and perceptions leading to community-based decision-making. PGIS projects employ a wide range of approaches (mental mapping, participatory sketch mapping, and participatory three-dimensional modelling) coupled with various tools (Global Positioning System, aerial photographs, remotely sensed data, photography, video, etc) offering important high-technological synergies. A significant area of PGIS application is urban land use planning, where PGIS can be considered a planning support system. PGIS allows local authorities to disseminate their intentions and investigates people's opinions on the process. This interactive planning can contribute to safe and healthy living while protecting the environment, allowing for economic development and the development of appropriate infrastructure. PGIS is also supportive of indicators engineering and computational planning that efficiently calibrates and orients territorial governance actions.

### Guest Editors

Dr. Kalliopi Kyriakou

The School of Civil Engineering, Aristotle University of Thessaloniki, Thessaloniki, Greece

Dr. Francesco Zullo

Department of Civil, Construction-Architectural and Environmental Engineering, University of L'Aquila, Piazzale E. Pontieri, 1, Monteluco di Roio, 67100 L'Aquila, Italy

### Deadline for manuscript submissions

closed (31 May 2024)

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
