## **Special Issue**

# Forest Ecosystems: Protection and Restoration II

#### Message from the Guest Editor

New studies are urgently needed that highlight developments in forest science in response to the changing climate and landscape degradation. This Special Issue focuses on all aspects of forest ecosystems across the major biomes: strategies are required for conservation and restoration to help resolve problems introduced by monocultures, resource conflict, expanding populations and forest exploitation. We particularly invite work that draws attention to and unifies today's topical themes and presents novel analyses. Papers are called for on the following topics:

- Tropical forests.
- Dryland forests.
- Temperate forests.
- Boreal forests.

Field studies, measurement and monitoring, data analysis, and remote sensing are effective tools for investigating ecological processes. Understanding an ecosystem's ability to withstand disturbance, control erosion, shelter biodiversity and provide food, water and energy is crucial. Scientifically based practical advice is sought to reverse this pending disaster on a global scale. We look forward to your contribution to the field of forest science.

### About the Journal

#### Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

#### Editor-in-Chief

#### Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
