

Special Issue

Landscape-Scale Sustainable Tourism Development

Message from the Guest Editors

Tourism is a very important topic. Modern tourism needs to be built on scientific principles; it should be based on empirical knowledge of the country to achieve a sustainable model. Such objectivity can accurately evaluate the positive effects and benefits of tourism on individuals, as well as enhance the natural and cultural assets of the recreational area or targeted destination. The goal of this Special Issue is to collect papers to provide insights into science-based tools that may help establish sustainable tourism models for both rural and urban landscapes and determine the impact of developing recreational landscapes. It welcomes manuscripts connected to the following: Ecological management of tourist areas; Cultural landscape management and planning; Landscape stability and carrying capacity conditions for tourism and recreation; Recreation potential based on landscape conditions; Tourism, landscape, and well-being; Tourism management in protected areas; Rural geography; Landscape protection.

Guest Editors

Dr. Ingrid Belčáková

Dr. Branko Slobodník

Prof. Dr. Szymon Szewrański

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
