Special Issue

Status in Agricultural Soil Pollution and Its Controls

Message from the Guest Editors

Agricultural soil pollution, has aroused considerable concern on agricultural product safety and ecological sustainability in China. Deep insight into the status of agricultural soil pollution benefits to enhance the security and sustainability. Therefore, it is urgently required to elucidate the causes, status, and mechanisms of various agricultural soil pollution and to numerically model and assess the pollutant impacts on environmental risks and and sustainability. For this special issue, we invite papers that include but are not restricted to the following topics about Chinese agricultural soil.

- High-tech in agricultural soil pollution mapping, monitoring, and assessment.
- Causes, status, and pollution mechanisms of agricultural soil pollution.
- Quantitative relationship among the input, accumulation, transportation, transformation, and runoff losses of agricultural soil pollutants.
- Agricultural product safety and ecological sustainability under contaminated agricultural
- Numerical simulation and scenario analysis of agricultural soil pollution processes.
- Pollution of controlling and remediation approaches of agricultural soil.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
