

Special Issue

Urban Regeneration and Local Development

Message from the Guest Editor

Interesting contemporary architectures (redefining the image of the modern cities), new solutions for urban organization (renovating planning patterns), new models of intervention (achieving urban resilience and climate change adaptation), support for innovative activities to settle down in the regenerated neighbourhood (improving jobs but also favouring mixed uses), and new public-private and also non-profit partnerships (with interesting solution for financial support to the urban renewal strategies) are the common lines of most of the recurring regeneration programs.

Recalling the strategic purpose of urban regeneration to be a strategy for improving urban life conditions, supporting local development, and improving community empowerment, this Special Issue would like to explore and assess regeneration attempts across the world, to analyse their tendencies and suggest some recommendations for correcting and readdressing regeneration approaches to a better social and economic impact, far beyond the recovering of built-up and declining parts of the city.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
