

Special Issue

Current and Future Trends of Socio-Economic Values in Terrestrial Ecosystem Services

Message from the Guest Editors

The aim of this Special Issue is to provide a collection of papers that research current and future trends of socioeconomic values in terrestrial ecosystem services. We present different socioeconomic values (political, economic, and societal) that shape terrestrial ecosystem services. You can provide applications of social or economic valuation techniques or methods to estimate the possible values or potential importance of terrestrial ecosystem services. Political studies that are relevant to this are also welcomed. The main themes of this Special Issue include, but are not limited to, the following:

- Socioeconomic value of terrestrial ecosystem services;
- Governance and policy of terrestrial ecosystems;
- Sustainable development goals;
- Relationships between society's needs and economic opportunities;
- Terrestrial ecosystems and conflicts in society;
- Sustainable management of terrestrial ecosystems;
- Policy appraisal and the ecological environment;
- Techniques or methods for the valuation of ecosystem services in land.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
