

## Special Issue

# Socioeconomic Evaluation of Climate Change Impacts on Land Ecosystems

### Message from the Guest Editors

This Special Issue focuses on the socioeconomic assessment of the climate change impacts on land ecosystems, utilizing non-market valuation methods, and integrated assessment models. The Special Issue will contribute to the understanding of the economic impact of climate change on land ecosystems from different perspectives, surfacing the physical and social interrelationships of the expected damages. This Special Issue of *Land* welcomes contributions from researchers on the following suggested topics:

- Land ecosystems impacts of climate change;
- Economic valuation of land ecosystem services;
- Integrated assessment model of climate change impacts on land ecosystems;
- Climate change land ecosystems impact policy formulation and evaluation;
- Regional and geographical differences in land ecosystems impacts and perceptions;
- Human reactions to land ecosystems impacts;
- Determinants of human behavior facing land ecosystems impacts;
- Physical and socioeconomic factors affecting land ecosystems impacts of climate change.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.
