

Special Issue

The Socio-Economic Values in Land Resource Management

Message from the Guest Editor

Land resources have high socioeconomic value and present the essence of society's existence. The Special Issue aims to present how power-driven decisions in the form of different socioeconomic values (political, economic and societal) did and still do shape land resource management. Further, we are interested in values that decisions are based on and how ecosystem services (food, water, wood, leisure, pollination, culture, etc.) offered by land resources have been affected in different states, regions and communities all over the world.

- Socioeconomic value of land resource management;
- Governance and policy of land resources;
- Sustainable development goals;
- Ecosystem services of land resources;
- Overpopulation and urbanization development;
- Food crisis and land resources;
- Relationships between society's needs and economic opportunities;
- Pollution of soil and water resources;
- Agriculture land soil sealing;
- Deforestation driven by wood production and agricultural production of monocultures;
- Land resources and conflicts in the society;
- Examples of sustainable management of land resources.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
