

Special Issue

Land Use, Biodiversity and Ecosystem Services on Coupled Rural–Urban Systems

Message from the Guest Editors

With the rapid development of cities and the decline of rural areas, issues including land-use conflict, biodiversity loss and ecosystem service function reduction have been threatening global sustainable development. It is necessary to address these relevant issues in the coupled rural–urban system. This Special Issue, "Land Use, Biodiversity and Ecosystem Services in Coupled Rural–Urban Systems", aims to deal with the synergies and potential links between rural and urban areas related to land use, biodiversity and ecosystem services. We invite papers that enrich the systematic research of rural–urban land science by exploring new findings on land use, biodiversity and ecosystem services in the coupled rural–urban system. We welcome frontier research and interdisciplinary research, and studies that provide solutions for sustainable rural–urban development.

Guest Editors

Prof. Dr. Xuesong Kong

School of Resource and Environmental Sciences, Wuhan University, Wuhan 430079, China

Dr. Jiaxing Cui

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
