

## Special Issue

# Urban and Rural Development Planning for Resilient Human Environments

### Message from the Guest Editors

To make human environments more resilient, new tools for spatial management, spatial and sectorial planning, and design are needed to increase the general quality of life; develop improvement and adaptation strategies for changing environments; and to improve preparedness for uncertainty, response, and recovery. The aim of this Special Issue is to provide an overview of new approaches to changing environments—conceptualization, tools, technologies, and methodologies—to answer the need of improving the quality of human environments as well as their potential to adapt to environmental changes (slow or fast).

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
