

Special Issue

Green Infrastructure Planning and Governance for Sustainable Urban Development and Quality of Life—Second Edition

Message from the Guest Editors

Green infrastructure (GI), encompassing a range of nature-based solutions, has emerged as a pivotal approach to address the multifaceted challenges posed by urbanization and climate change. GI can effectively enhance air quality, manage stormwater, and increase biodiversity, thereby promoting a healthier urban ecosystem. GI has been linked to quality of life in urban settings such as improved mental well-being and refined landscape aesthetics. As urban areas confront future uncertainties such as climate change, population growth, and socio-economic shifts, GI provides a critical pathway to reduce environmental risks and strengthen social cohesion and community engagement. In this Special Issue, we will collect papers (original research articles and review papers) that give insights into the contribution of green infrastructure to sustainable urbanization. This Special Issue will also contribute to the discourse on green infrastructure planning and governance by providing a platform for innovative research and practical solutions that inform policy and practice.

Guest Editors

Prof. Dr. Xinhao Wang
Dr. Xin Fu
Dr. Chen Shen

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
