

Special Issue

Land Administration Domain Model (LADM) and Sustainable Development

Message from the Guest Editors

The Special Issue on "Land Administration Domain Model (LADM) and Sustainable Development" recognizes the importance of integrating sustainable land administration practices into the broader context of the 2030 Agenda. With the recent advancements represented by LADM Edition II, encompassing critical components like land value, land use, and marine space and georegulations, the model holds potential to support several SDGs. It aligns with SDGs 1 (No Poverty), 2 (Zero Hunger), 5 (Gender Equality), 8 (Decent Work and Economic Growth), 9 (Industry, Innovation, and Infrastructure), 11 (Sustainable Cities and Communities), 14 (Life Below Water), and 15 (Life on Land), as assessed by ISO/TC 211. This Special Issue invites contributions from researchers, practitioners, and policymakers, focusing on original research, case studies, and reviews that explore the linkages between LADM Edition II and specific SDGs. Topics of interest include the role of land administration in poverty eradication, food security, gender equality in land rights, sustainable urban planning, blue economy development, biodiversity conservation, and effective disaster management.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
