

Special Issue

Land Management for Climate-Responsive Development

Message from the Guest Editors

This Special Issue is intended to provide an understanding of the influences of climate change on land uses, tenureships, and values, as well as the influences working in the opposite direction. It also includes the techniques that can be used to assess those influences, as well as the key policy tools related to land development and investment strategies that can effectively and efficiently protect the most vulnerable communities from the impact of climate change.

We, therefore, invite contributions covering, for example, the following topics:

- Lessons learned from different countries showing the best and/or bad practices of land management and development and their link to climate change;
- Innovative approaches for land management and development strategies to support climate change adaptation and mitigation;
- New tools and technologies to support multi-stakeholder planning and/or collaborative management approaches in land management and development processes to support climate change adaptation and mitigation.

Guest Editors

Dr. D. Ary A. Samsura

Dr. Kristoffer Berse

Prof. Dr. Yusfida Ayu Abdullah

Dr. Naim Laeni

Deadline for manuscript submissions

30 September 2025

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
