

Special Issue

Social–Ecological Ecosystems in Rewilding Urban Environment: Multidisciplinary Approaches for Multifaceted Wild Natures

Message from the Guest Editors

This Special Issue aims to present the current state of socio-ecological research on wild urban nature, focusing on the concept of the social–ecological system, where human and biophysical systems are closely linked. Suggested themes and article types include, but are not limited to:

- Cultural and ecological services (and eventually disservices) of rewilded urban areas;
- Processes and approaches that lead to wild nature implementation in urban plans;
- Proposals for the construction of socio-ecological indicators to characterize rewilded sites;
- Approaches to combine sociological and ecological indicators in data analysis;
- Biodiversity and socio-political dynamics within the framework of cities' land use change processes;
- Monitoring schemes of urban rewilding sites, including remote sensing techniques and field data collection;
- Difficulties and potentiality in the management and enhancement of wild urban sites;
- Bottom-up participatory case studies (e.g., citizen science initiatives) that can be considered lead experiences;
- Links between biodiversity characteristics of wild areas and social perceptions.

Guest Editors

Dr. Giovanni Trentanovi
Prof. Dr. Roberta Bartoletti
Dr. Francesco Sacchetti

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
