

## Special Issue

# Green Development of Urban-Rural System and Sustainable Land Management

### Message from the Guest Editors

The world is facing unprecedented changes due to increased human activity, leading to resource depletion and environmental degradation. As we enter the Anthropocene, there's an urgent need for sustainable development that balances social equity and ecological civilization, particularly in agriculture and rural areas. This Special Issue seeks papers on urban-rural green development, land use policy, human-earth relations, geographic engineering, rural revitalization, urbanization's impact on agriculture, and urban-rural resilience. The aim is to integrate human-land system science with interdisciplinary methods to advance sustainable land management and promote a sustainable green development path.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
