

Special Issue

Holistic Approaches to Landscape Restoration and Sustainable Livelihoods Development

Message from the Guest Editors

Empirical evidence of “how” the use of holistic approaches to landscape restoration research (such as the ecosystem services approach, socio-ecological systems framework, and landscape approaches) can foster community-based landscape restoration and sustainable livelihood development remains limited. In this Special Issue, we aim to collect such evidence. We aim to collect articles that demonstrate in particular the functioning of landscape approaches and the socio-ecological systems framework, and that analyze the role of communities and stakeholders in ecosystem management. We will explore possible solutions in combatting further land degradation and resource depletion, with a view to enhance wellbeing and adapt to climate change.

Themes: Use of the landscape approach, socio-ecological systems framework, and other holistic approaches in ecosystem services management at the landscape level. Evidence of truly bottom-up landscape restoration interventions (including opportunities, challenges, and lessons from practice). Tools and approaches for participatory multi-stakeholder collaboration in holistic landscape management.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
