

## Special Issue

# Application of the Ecosystem Service in Landscape Planning: From Cognition to Decision-Making (2nd Edition)

### Message from the Guest Editors

The ecosystem service (ES) provides straightforward insights for different stakeholders to understand the benefits provided by landscapes to humans. One of the ultimate goals of landscape planning is to improve human wellbeing, which depends on the sustainable ES supply. In recent years, scientists have devoted great efforts to integrating ES science into landscape planning. However, it should be noticed that the application of the ES in landscape planning is still in the early stage. This Special Issue aims to bridge ES science and landscape planning practice. We particularly welcome submissions on the following topics:

- The conceptual framework linking landscape planning with the ES;
- Landscape planning and management decision-making based on the ES;
- Evaluating the impacts of existing and potential landscape planning on the ES;
- ES trade-offs/synergies in landscape planning;
- Developing ES assessment technologies oriented with landscape planning.

Through the publication of this Special Issue, we hope to provide new perspectives and methods for strengthening the linkage between the ES and landscape planning. We look forward to receiving your articles.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
