

Special Issue

Urban Landscape Transformation vs. Heritage

Message from the Guest Editors

As cities today are facing the consequences of rapid population growth and uncontrolled urbanisation, as well as the impact of environmental changes and disaster, there is a growing pressure in terms of land resources and limited usable land available in urban areas. Within this rapidly shifting everchanging and globally evolving urban context, rethinking the role of heritage as an integral part of urban landscapes and land usage requires new attention, definitions and comparisons.

The Special Issue, therefore, employs the term heritage urbanism, an internationally recognised scientific approach to the restoration and revitalisation of cultural natural and mixed heritage. The goal of this Special Issue is to collect papers (original research articles and review papers) to address the following questions:

- How can urban landscape transformation contribute to the protection and preservation of heritage?
- Does urban landscape transformation, in fact, transform heritage?
- Can urban landscape transformation generate, create and develop new heritage?

We look forward to receiving your original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
