

Special Issue

Regional Sustainable Development of Yangtze River Delta, China (3rd Edition)

Message from the Guest Editors

We are pleased to announce the Special Issue of Land on “Regional Sustainable Development of Yangtze River Delta, China (3rd Edition)”. The Yangtze River Delta is one of the regions with the most active economic development, the highest degree of openness and the strongest innovation capacity in China. This Special Issue aims to provide theoretical support and practical experience for the sustainable development of the Yangtze River Delta region. The scope of this Special Issue includes, but is not limited to, the following topics in the Yangtze River Delta region:

- Coordinated human–nature development;
- Ecosystem service trade-offs and synergies;
- Collaborative ecological and environmental governance;
- Industrial development and innovation network linkage;
- Territorial space optimization and natural resource management;
- Carbon peaking and carbon neutrality in the context of climate change;
- Integration of infrastructure and public services;
- Urban–rural coordination and rural revitalization;
- Population migration patterns and spatial pattern changes;
- Food security and sustainable agriculture.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany
