

Special Issue

Agricultural Land Management to Meet Future Global Food Demand (Second Edition)

Message from the Guest Editors

For this Special Issue, we are interested in contributions that link agricultural land management practices to food production. This Special Issue also welcomes papers on unsustainable land management practices, as they can provide good lessons. Since the journal *Land* is a key platform for readers and contributors interested in this topic, we believe that *Land* is the most suitable platform for our Special Issue, "Agricultural Land Management to Meet Future Global Food Demand (Second Edition)". We invite conceptual works and original research, review, and synthesis papers that address research issues including, but not limited to, the following:

- The sustainable intensification of agricultural land;
- Modeling agricultural systems and food production;
- The design and implementation of land management practices;
- Economic analyses of agricultural interventions;
- The adoption and diffusion of agricultural technologies;
- Agricultural adaptation and the mitigation of climate change and climate variability;
- The environmental benefits of land management practices.

The first edition can be seen at:

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
