

## Special Issue

# Urban Landscapes for Well-Being: Designing Resilient Spaces for Healthier Communities

### Message from the Guest Editors

Urban residents' health and well-being are facing unprecedented shocks and challenges due to issues including high-density living environments, ecological issues, and insufficient public spaces, which are being caused by rapid global urbanization. Urban planning and landscape design are seen as crucial strategies in addressing these problems. Therefore, understanding how urban planning and landscape design can enhance community health and resilience and subsequently improve urban residents' well-being is essential in sustainable urban development. Our goal in launching this Special Issue is to showcase new scientific papers exploring the mechanisms behind how urban landscapes influence human well-being and how effectively they can be harnessed. For this Special Issue, we welcome manuscripts that link the following themes:

- Multi-functional urban space evolution and its effects;
- Impacts of urban landscapes on residents' well-being;
- Innovative methods for resilient urban planning and landscape design.

We look forward to receiving your original research articles and reviews.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
