

Special Issue

Feature Papers for Land–Climate Interactions Section: Integration of Remote Sensing and GIS

Message from the Guest Editor

This Special Issue will compile cutting-edge research that highlights the application of remote sensing and GIS technologies in studying land–climate interactions. This Special Issue will provide a comprehensive overview of the latest advancements and applications in this interdisciplinary field, emphasizing the importance of integrating these technologies to enhance our understanding of the complex relationships between land and climate. This Special Issue will welcome manuscripts that link the following themes, including but not limited to the topics below:

- Remote sensing of land surface processes;
- Carbon and biogeochemical cycles with remote sensing and GIS;
- Land use/land cover change and climate feedbacks;
- New methods for the fusion of multi-sensor data to improve land–climate interaction studies.

We look forward to receiving your original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
