

Special Issue

Reconfiguring Human–Climate–Ecosystem Interactions: Patterns, Risks, and Methodology Innovations

Message from the Guest Editors

Aligned with the interdisciplinary scope of *Land*, this Special Issue welcomes contributions that bridge hydrological modeling, water cycle analysis, land system science, and ecological risk assessment. Emphasis will be placed on methodological innovations—including integrated methodology, data-driven approaches, and remote sensing applications—that deepen our understanding of coupled human–natural systems. This Special Issue will welcome manuscripts that link the following themes:

- Hydrological modeling and water cycle analysis in land–climate–ecosystem systems;
- Spatial heterogeneity and scaling issues in land use, geomorphology, and landscape dynamics;
- Ecological risk and environmental sustainability under human and climatic pressures;
- Coupled human–natural system assessments and socio–environmental feedback mechanisms;
- Integrated methodology and data-driven approaches for modeling and prediction;
- Remote sensing and geospatial analytics for land system monitoring and evaluation.

We look forward to receiving your original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
