Special Issue

Agroforestry Land Transformations in High Landscape Value Areas

Message from the Guest Editor

The aim of this Special Issue is to provide additional scientific perspectives to the topic of agroforestry land abandonment. In addition, in view of the diversity of impacts at the geographical level, this Special Issue aims to gather case studies at the local level in order to define the current trends in different countries. In particular, covered topics include, among others:

- Methods and methodologies for quantitative and qualitative assessment of agroforestry land abandonment processes;
- New geospatial applications for the integration of historical cartographies, photo areas and satellite images for transformation analyses;
- Innovative remote-sensing techniques for the identification and characterization of abandoned agroforestry areas;
- Assessment of positive and negative impacts of the abandonment process:
- Study and analysis of drivers of abandonment;
- Specific case studies in areas of high landscape value (e.g., historic rural landscapes or protected areas).

Papers selected for this Special Issue are subject to a rigorous scientific peer-review procedure, aimed at a wide and effective dissemination of research outcomes.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
