

## Special Issue

# Urban Nature, Public Space and Walkable Urban Form for Climate Resilience, Planning and Design

### Message from the Guest Editors

This Special Issue of *Land* seeks to advance cross-disciplinary insight into how spatial planning, urban design, urban morphology, and nature-based solutions can contribute to the creation of walkable, ecologically connected, and climate-resilient urban environments.

- Spatial structure and morphological dimensions of green, walkable, and public space networks in cities;
- Urban design and planning strategies linking green infrastructure, public space, reforestation, and pedestrian mobility;
- Indicators and spatial metrics for assessing walkability, connectivity, ecological performance, and climate resilience;
- Revitalisation and regeneration of underused or obsolete urban structures through integrated nature-based, reforestation, and walkability approaches;
- Policy, governance, and planning frameworks supporting cohesive, sustainable, and climate-resilient urban networks;
- GIS, spatial network, and remote sensing methods for analysing interactions of green infrastructure systems, urban form, and public spaces;
- Relationships between green infrastructure, public health, climate resilience, and social interaction in urban environments

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
