Special Issue

Influence of the 2030 Agenda in the Design of Policies to Fight Poverty and Social Exclusion in Rural and Urban Contexts

Message from the Guest Editors

In this Special Issue, we want to focus on the articulation of the 2030 Agenda at the domestic level on policies addressing social exclusion in rural and urban contexts, both in countries from the Global North and the Global South.

We would like to invite scholars to explore questions such as: How is the 2030 Agenda influencing the design of domestic policies dealing with rural and urban poverty and inequality in those countries that are adopting it as an inspiring framework? How is the conflict between global and domestic interests being incorporated in the design of such policies? What elements of the policy design deal with the participation of the most vulnerable local stakeholders in the process? What learnings may be drawn from similar experiences of multilevel policy design (e.g., EU directives or EU recommendations) that could be applied to the 2030 Agenda? How and what diffusion models of the 2030 Agenda are being implemented? Most of these questions are still underexplored in the academic literature, in part due to the still recent adoption of the 2030 Agenda.

Land

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst
Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:
JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
