

Special Issue

Trends in Functional Biodiversity and Resilience of Agriculture and Forestry Landscapes in the Anthropocene

Message from the Guest Editors

The dominant socioeconomic factors inducing landscape dynamics in rural regions worldwide produce feedbacks originating from vortexes of environmental and ecological changes, which ultimately impact their associated services. With time lags characterizing socioecological systems and nonlinear features and the difficult-to-reverse nature of regime shifts interceded by tipping points, the importance of the concept and application of resilience of ecosystems and landscapes has been brought to light. In fact, societal and ecological mechanisms usually interact, generating changes in biological communities, degradation of ecosystems, and effects on landscapes and human wellbeing in a much more imperceptible and misunderstood way. The aim of this Special Issue is to bring together cutting-edge investigation on the problematics of managing landscapes on our fast-moving planet, with a special focus on the application of new and disruptive investigations supported by socioecology, functional biodiversity, and resilience concepts.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
