

Special Issue

Archaeological Landscape and Settlement

Message from the Guest Editors

The goal of this Special Issue is to set up a series of papers regarding different approaches to landscape archaeology, independent of the geographic location and chronology of the sites involved. The improvement of radiocarbon dating techniques in recent decades has played an important role in the chronological definition of the periods during which different cultural aspects developed, weakened, and later disappeared. Another important topic regards the exploitation of highland zones. When and why did people start to explore extreme mountain environments? What kinds of activities did they practice there? These are some of the topics this Special Issue on Landscape and Settlement is expected to investigate.

- human impact on the landscape
- coastal changes and sea-level rise
- settlement patterns and sites complementarity
- radiocarbon dating
- the exploitation of the highland zones
- mining raw material sources
- stone and metal

Guest Editors

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
