Special Issue

The Impact of Brownfields and Brownfield Regeneration Projects on Land Cover Changes and Land Use Planning

Message from the Guest Editor

Brownfields are properties, both within cities and in the countryside, having previously had an economically viable use, then vacated and possibly left contaminated. The reuse of brownfields creates a great opportunity for the acceleration of long-term regeneration processes in the whole area. This Special Issue seeks manuscripts reflecting different spatial and planning aspects of brownfield persistence and redevelopment in urban as well as in rural areas, specially regarding the following priority areas:

- Solving the brownfield issue in local development planning;
- Impact of presence of brownfield on land cover and land use in neighboring areas;
- Impact of the environment on brownfield redevelopment projects;
- Preferences for brownfield redevelopment project in different environments;
- Perception of brownfield impacts on surrounding areas by local inhabitants.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
