

Special Issue

Right to the City as a Response to Pandemics and Climate Challenges

Message from the Guest Editors

The aim of our Special Issue will be to align the current urban challenges of pandemics and climate protection with the aims and demands of the right to the city concept. On the one hand, this will involve providing evidence and materials from different parts of the world, and on the other hand, on the basis of these (as well as an in-depth analysis of the literature on the subject), redefining the concept of right to the city. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: - Residents' right to urban health and urban policy; - Environmental and nature protection in cities as an element of right to the city; - Climate protection in urban policy as an element of right to the city; - Developing public participation in post-pandemic urban policy—new methods and measures; - New directions in urban planning and zoning (changes due to pandemic and climate protection); - Legal changes to protect urban health and climate more broadly.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
