

Special Issue

Framing Resilient Cities: Water and Public Spaces to Face Climate Change

Message from the Guest Editors

Water from the sky, water from the ground: water has always been a fundamental resource of life and cities. For this Special Issue, we are interested in contributions that investigate and reflect the importance of water inside contemporary cities to face climate change through either empirical research or conceptual/theoretical works, examining any key processes. Contributions at the intersection of geography, political ecology, architecture, and urbanism are especially welcome, but contributions from other human–environment fields at the forefront of water and public space in the climate change context are also highly welcome. Regional and scalar diversity in contributions is also desired.

Guest Editors

Prof. Dr. Sandra Ricart

Prof. Dr. Carlo Berizzi

Prof. Dr. David Sauri

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
