Blue Carbon Dynamic in the Coastal Wetlands

Message from the Guest Editors

Coastal blue carbon, especially that found in mangrove forests, seagrass meadows, and tidal marshes, is a crucial component in marine carbon sink reservoirs. These fragile ecosystems are located in the transitional areas between the sea and land, and are therefore profoundly affected by natural environmental changes and human activities, resulting in habitat degradation, fragmentation, loss of biodiversity, and reduced ecosystem functions. Thus, it is urgent that we increase efforts towards the restoration and conservation of coastal blue carbon. For this purpose, we are inviting researchers to submit articles that advance our understanding of coastal blue carbon ecosystems, including approaches considering their distribution, area, health, protection status and biogeochemical processes.

Themes:

The classification, protection, and repair of blue carbon environments.

Biogeochemical processes of blue carbon.

The role of blue carbon in climate change mitigation and adaptation.

Future of blue carbon: new ideas, new services, and new models.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
