

Special Issue

Common Properties for the Sustainable Management of Territories

Message from the Guest Editors

In recent decades, the concept of biodiversity conservation has evolved thanks also to the crucial contribution of local communities in protecting the natural environment. In this perspective, an aspect of significant and renewed interest is represented by common properties—those resources that, by tradition, local communities own and manage collectively and which generally concern forests, woods, pastures, waterways, etc. They are institutions, currently custodians of multiple values—tangible and intangible—that have played a fundamental role in the conservation of natural resources and that can now make it possible to rediscover new forms of sustainable and solidarity-based territory management. The aim of this Special Issue is to promote an international and interdisciplinary scientific comparison on the broad and complex theme of common properties, both in terms of environmental protection and territorial economic, social and cultural development policies.

Guest Editors

Dr. Fabiana Forte

Department of Architecture and Industrial Design, University of Campania “Luigi Vanvitelli”, Via San Lorenzo ad Septimum, 81031 Aversa, Italy

Prof. Dr. Pietro Nervi

Fondatore e Presidente del Centro studi e documentazione sui demani civici e le proprietà collettive, Università degli Studi di Trento, Via Giovanni Prati, 2 - I-38122 Trento, Italy

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
