

Special Issue

Cultural Landscapes

Message from the Guest Editors

This Special Issue focuses on innovative approaches that enhance our understanding of the functioning of cultural landscapes from local to regional scales. In addition to studies on the provision of and demand for ecosystem services in rural areas, analyses of interactions along rural–urban gradients are within its scope. Contributions that integrate different scientific disciplines and collaboration with practitioners as well as evidence pertaining to the effects of technological or social innovations on ecosystem services are particularly welcome.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
