

Special Issue

Diversifying Forest Landscape Management Approaches

Message from the Guest Editors

Around the world, forest landscapes provide multiple ecosystem services that are essential for human wellbeing and welfare, and they form the habitats for a wide range of terrestrial and aquatic species. Unfortunately, forest management strategies focusing on the maximum sustained yield of wood have compromised the patterns and processes of naturally dynamic forest ecosystems. In response, forest policies and novel management strategies call for the development of planning and management approaches toward sustainable forest management. At present, forestry is hotly debated among stakeholders and actors. This Special Issue aims at publishing innovative research that supports sustainable forest management and landscape planning in different parts of the cycle of policy creation, implementation, management, and assessment of progress. We welcome research that includes local case studies, international comparisons, and transdisciplinary studies of relevance for sustainable forest management and landscape planning. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
