

Special Issue

Land Use Mapping as the Base for Modeling and Earth Oriented Digital Twins

Message from the Guest Editor

This Special Issue will collect papers related to existing LULC models. But it will also be focused on modeling and AI tools dealing with LULC. We are interested in papers focused on the use of remote sensing for detection changes, usage of HPC and cloud computing for modeling and analysis of land-use changes, and on paper demonstrations of the use of LULC in different domains.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
