

Special Issue

Ecology of the Landscape Capital and Urban Capital

Message from the Guest Editor

The role of Green Infrastructure in Landscape Capital and Urban capital can be influenced by different values and the importance that humans give to biodiversity at a certain time based on human needs, the manner that they use the goods and services, human awareness of benefits and their accessibility. This Special Issue aims to promote of the concept of ecosystem services in ecological planning passing from the concept of "ecosystems in landscape and urban systems" to "landscape and urban systems as ecosystems", and implying a concept leap from "ecology in socio-ecological capital" to the "ecology of socio-ecological capital". I encourage you to contribute a research or comprehensive review article for consideration for publication in *Land*, an international Open Access journal which provides an advanced forum for research findings in sustainability and sustainable development. *Land* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing your understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
