

Special Issue

Ecosystem Services Design from Single Space Solution to Landscape Vision

Message from the Guest Editor

Ecosystem service design should include physical structures, such as implementing ecosystems in landscape and urban space to provide ecological processes that can mitigate environmental issues, but also consider specific social activities and economic benefits that can be derived from their utilizations to maximize human wellbeing. Therefore, a broad range of solutions can be implemented in both private and public spaces involving different stakeholders. This requires a cultural leap and new vision for green space design to support priority ecosystem services that are capable of creating connections between high ecological resilience, new business and economic opportunities, and multiscale environmental and cultural aspects. Therefore, the Special Issue will promote research, review, and other types of manuscripts that focus on promoting ecosystem regeneration, ecosystem services, and green infrastructure and their management, as well as new policies and tools for their promotions and diffusion with a bottom-up (from a single applicative case to analyze methodologies and effectiveness) or top-down approach (from research to transfer in an applicative way).

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
