

Special Issue

Forest Landscape Restoration: Strategies, Challenges, and Impacts

Message from the Guest Editors

Restoring functional, sustainable, and resilient ecosystems can provide multiple ecological, social, and economic benefits. These benefits include: human wellbeing and sustainable livelihoods; wildlife and pollinator habitat; climate change mitigation; biodiversity and gene conservation; urban beautification; soil stabilization and rehabilitation; watershed and fisheries protection; air quality; medicinal and cultural plant availability; recreations; and more. Many effective restoration approaches exist and are applied according to local resources, needs, and environmental conditions. For forest restoration to be successful, however, any short- and long-term biological, logistical, cultural, political, and economical limitations must be evaluated and addressed. This Special Issue focuses on strategies for innovative and effective approaches to forest restoration and their associated local, national, and/or global ecological, social, and economic impacts. We encourage authors to submit papers that provide practical strategies for addressing restoration challenges along with their expected short- and long-term benefits.

Guest Editors

Dr. Diane L. Haase

Dr. Jeremiah R. Pinto

Dr. Owen T. Burney

Deadline for manuscript submissions

closed (15 June 2021)

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
