

Special Issue

Ecological Indicators for Landscapes Analysis and Interpretation: The Role of Multi-Temporal Geospatial Data

Message from the Guest Editors

Landscape, by its very definition, needs to be understood as a constantly changing entity. Because of this intrinsic characteristic, its study needs to be carried out using proper indicators and multi-temporal approaches in order to detect the changes occurring over time and/or to enable the better characterization of its different components.

In this Special Issue, we invite papers focusing on, but not limited to, practical applications of ecological indicators derived by geospatial multi-temporal data tools, techniques, and strategies for landscape study and characterization at different spatial scales (local, regional, national) as well as papers that aim to explore the advances that have been made in the assessment and implementation of data processing in landscape dynamics studies. Contributions based on multidisciplinary approaches, resulting from collaboration between researchers and practitioners, and highlighting the effects of technological innovations on landscape services are also welcome.

Guest Editors

Dr. Salvatore Praticò

Dr. Francesco Solano

Prof. Salvatore Di Fazio

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
