The Governance of Land Use

Message from the Guest Editors

How land is used is connected to some of the most important policy issues of our time: sustainable development, reducing territorial inequalities, economic development, and the rights of future generations, to name but a few. Given this, there is an urgency to ensure land is managed efficiently, equitably, and responsively. There is growing recognition that a wide range of policies shape how land is used and managed beyond that of land use and environmental planning. From fiscal and tax incentives to industry subsidies and infrastructure or transportation program design—a myriad of incentives and disincentives shape choices that play out across our land, often leading to perverse outcomes, such as a loss of agricultural land, high housing prices or costlier services. This call for papers urges authors to adopt a broad view on the governance of land use—to consider the range of policies across scales that shape how land is used and managed. We seek research contributions that demonstrate the incentives and disincentives that these policies and practices create and that propose stronger alignment to meet land management goals.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
